

SYMBIOSIS INSTITUTE OF TECHNOLOGY (SIT)

Constituent of Symbiosis International (Deemed University), Pune

(Established under Section 3 of the UGC Act of 1956 vide notification number F-9-12/2001-U-3 of the Government of India)
Re-Accredited by NAAC with 'A' Grade

Department of Computer Science and Engineering DevOps Lab - L3

Lab Assignment No: 1	
Name of Student	Sanyukt Ramola
PRN	23070122194
Batch	2023 - 2027
Class	CSE – B1
Date of Performance	16/6/2026
Academic Year & Semester	2026 - 2027, 7th Semester
Title of Assignment	Git Setup & Basic Workflow
Implementation and Theory	Commands Used 1. cd D:\CCodes – Navigated to the directory where the repository would be stored. 2. git clone https://github.com/riavinod10/devops-lab.git – Cloned the remote GitHub repository to the local machine. 3. cd devops-lab – Entered the cloned repository folder. 4. echo "# DevOps Lab" > README.md – Created the README.md file with initial content. 5. git status – Checked the repository status to verify that README.md was listed as an untracked file. 6. git add README.md – Added the README.md file to the staging area. 7. git status – Verified that the file was staged and ready to be committed. 8. git commit -m "Add initial README.md file" – Created the first commit with a descriptive commit message. 9. git status – Confirmed that the working tree was clean after the commit. 10. git push origin main – Pushed the committed changes from the local repository to the remote GitHub repository.
Implementation	Step-1: Creating a Github repository

Empty Repository on GitHub — Created an empty repository named Git_prac on GitHub without initializing it with a README, .gitignore, or license file to practice the Git local-to-remote workflow.

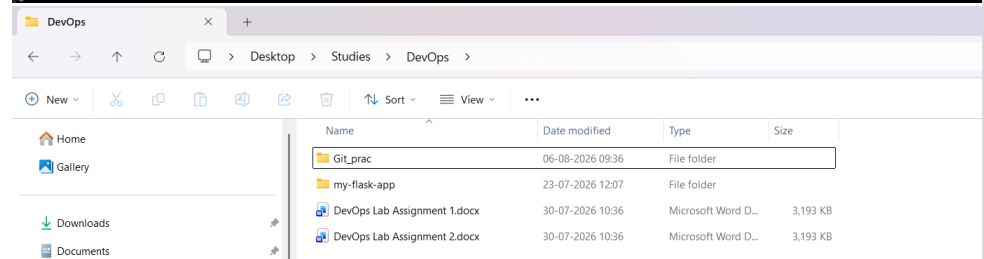

Step 2: Clone the Repository

```
sanyu@SANYUKT MINGW64 ~/onedrive/desktop/studies
$ cd devops

sanyu@SANYUKT MINGW64 ~/onedrive/desktop/studies/devops
$ ls
'DevOps Lab Assignment 1.docx'  Git_prac/      '~$vOps Lab Assignment 1.docx'
'DevOps Lab Assignment 2.docx'  my-flask-app/

sanyu@SANYUKT MINGW64 ~/onedrive/desktop/studies/devops
$ git clone https://github.com/Kranvagn4/Git_prac
Cloning into 'Git_prac'...
remote: Enumerating objects: 6, done.
remote: Counting objects: 100% (6/6), done.
remote: Compressing objects: 100% (2/2), done.
remote: Total 6 (delta 0), reused 3 (delta 0), pack-reused 0 (from 0)
Receiving objects: 100% (6/6), done.

sanyu@SANYUKT MINGW64 ~/onedrive/desktop/studies/devops
$
```

The repository has been cloned into the local storage through using the directory path and using the clone command from bash for the repo link.

Step 3: Create README.md

```
sanyu@SANYUKT MINGW64 ~/onedrive/desktop/studies/devops
$ cd Git_prac

sanyu@SANYUKT MINGW64 ~/onedrive/desktop/studies/devops/Git_prac (main)
$ ls
README.md

sanyu@SANYUKT MINGW64 ~/onedrive/desktop/studies/devops/Git_prac (main)
$ git add README.md

sanyu@SANYUKT MINGW64 ~/onedrive/desktop/studies/devops/Git_prac (main)
$ git status
On branch main
Your branch is up to date with 'origin/main'.

nothing to commit, working tree clean

sanyu@SANYUKT MINGW64 ~/onedrive/desktop/studies/devops/Git_prac (main)
$
```

Step 5: Commit the Changes

```
sanyu@SANYUKT MINGW64 ~/onedrive/desktop/studies/devops/Git_prac (main)
$ git commit -m "Add initial README.md file"
On branch main
Your branch is up to date with 'origin/main'.

nothing to commit, working tree clean

sanyu@SANYUKT MINGW64 ~/onedrive/desktop/studies/devops/Git_prac (main)
$ git status
On branch main
Your branch is up to date with 'origin/main'.

nothing to commit, working tree clean

sanyu@SANYUKT MINGW64 ~/onedrive/desktop/studies/devops/Git_prac (main)
$
```

Committed Changes- Created the first commit with a descriptive commit message and verified that the working tree is clean.

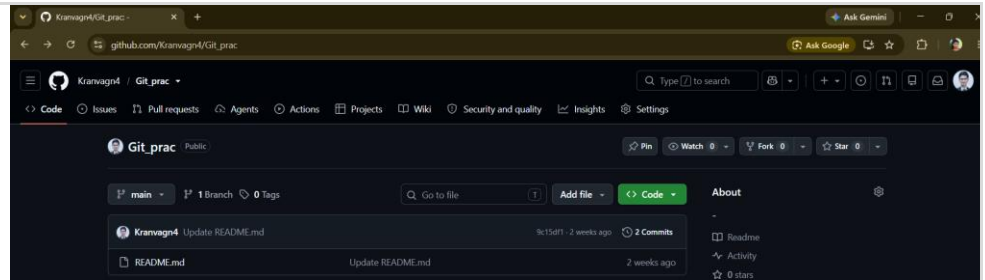

Step 6: Push to GitHub

```
sanyu@SANYUKT MINGW64 ~/onedrive/desktop/studies/devops/Git_prac (main)
$ git push origin main
Everything up-to-date

sanyu@SANYUKT MINGW64 ~/onedrive/desktop/studies/devops/Git_prac (main)
$ z
```

Pushed to Remote Repository: Uploaded the local commit to the remote GitHub repository using git push.

Step 7: Verify on GitHub

Repository Verified: Verified on GitHub that the README.md file and the latest commit are visible, confirming the push was successful.

Subject Faculty Name: Prof. Arijit Dutta
