Ln 26, Col 2Spaces: 4UTF-8CRLF{ } JavaGo Live

The screenshot displays an IDE interface with a dark theme. The top menu bar includes File, Edit, Selection, View, Go, Run, Terminal, and Help. The Explorer panel on the left shows a project structure for 'RETAIL-APP' with folders like .mvn, src, main, resources, static, templates, test, and target, and files like Product.java, RetailAppApplication.java, RetailController.java, application.properties, mvnw, mvnw.cmd, pom.xml, and Dockerfile. The Dockerfile is selected and its content is shown in the editor:

```
Dockerfile > ...
1 FROM eclipse-temurin:17-jre
2
3 WORKDIR /app
4
5 COPY target/retail-app-0.0.1-SNAPSHOT.jar app.jar
6
7 EXPOSE 8081
8
9 ENTRYPOINT ["java", "-jar", "app.jar"]
```

The Terminal panel at the bottom shows a PowerShell session. The user has run 'dir target' and 'docker build -t retail-app:1.0 .'. The output of 'dir target' is as follows:

	11-08-2026	10:21	
d----	11-08-2026	10:21	surefire-reports
d----	11-08-2026	10:21	test-classes
-a----	11-08-2026	10:21	19868235 retail-app-0.0.1-SNAPSHOT.jar
-a----	11-08-2026	10:21	3778 retail-app-0.0.1-SNAPSHOT.jar.original

The 'docker build' command resulted in an error: 'ERROR: failed to connect to the docker API at npipe:///pipe/dockerDesktopLinuxEngine; check if the path is correct and if the daemon is running: open ///.pipe/dockerDesktopLinuxEngine: The system cannot find the file specified.'
